

2000

The company Triton Pardubice accomplished another stage of production facility construction. A new warehouse and logistics facility with an area of 2100m² was opened.

2001

Whole production runs in three halls with an area of 9700m². State-of-the-art technologies are linked together as a one compact unit, which has no competition within medium-sized companies across the market of Europe. Full automation, maximal performance and low energy consumption of each machine are guarantee of excellent quality and low prices of our products.

2008

Relationship to the environment is already visible from afar. The property company is based in the park, in which are planted hundreds of trees and shrubs, which help to integrate the factory buildings into the surrounding landscape.

2011

Please accept our invitation to tour of our company Triton Pardubice in Starý Mateřov and see the seriousness the previous words.
